A New Tooth and Mouth Wash at the

Orchard City Drug Co

---Announcement---

Beginning about June 20th we will adopt the new San Lat Seal for our milk bottles.—Watch for them!

Altho these seals will cost us nearly four times as much as the caps we use at present, we feel justified in adopting them because of the assurance that it gives us that our milk will reach your table in as clean a condition as it is when we bottle it. We feel that these seals will assist us greatly in our efforts to produce and deliver milk of the best quality.

Yours for sanitary service:

Local and Personal

Quality stationery at Smith's.

Mr. and Mrs. W. R. Coupland enjoyed an outing in the Big Basin Sunday.

Mrs. E. C. Merrill and children went to Santa Cruz Monday for a two week's outing.

Mr. and Mrs. I. Zion and Mrs. Barney Smith motored to Pacific Grove Tuesday for a week's outing.

Geo. S. Robson is one of the soldier boys. He went to Monterey Sunday for a month of drill at the "Citizenry" camp.

E. C. Merrill took a motor truck load of Montezuma school boys to the Lick observatory Saturday night for a peep at the moon.

Mrs. Chester Archibald and daughter of Reno arrived Monday and are visiting Mrs. Archibald's parents, Mr. and Mrs. G. L. Speegle.

Mr. and Mrs. Roy Archibald go to Capitola Saturday for a couple of weeks. Mrs. H. V. Archibald will be with them part of the time.

Mrs. B. F. Gruver and daughter returned to their home at Monterey Monday after a two weeks visit here with Mrs. C. F. Rubell.

Miss Belle Burdick left Saturday for Omaha. She has accepted a position in the school at Herman, near Omaha, and has gone to take up her work there.

The Misses Marion, Alice and Elizabeth Duncan, and Mrs. Easton Carter will spend two weeks "by the sea waves" at Capitola, beginning Saturday.

Mrs. F. Baldwin and Mrs. Caldwell and little daughter were over from Los Gatos to spend Wednesday with Mrs. Baldwin's sister, Mrs. W. R. Coupland.

Mrs. H. C. Smith and daughter, Wilma, will be among the Campbellites at Capitola for the coming two weeks, Mr. Smith spending the week-ends with 'em.

John Chestnut and family of San Jose are at the J. E. Palmer home during his wife's absence in the East, and J. E. is enjoying some real home-cooked these days.

Mrs. McCoy and son, Harry, came up from Porterville Tuesday and are visiting Mrs. McCoy's parents, Mr. and Mrs. Jos. Gard. Mr. McCoy will join them Saturday for a vacation at Santa Cruz.

Mr. Stone who occupied the pulpit of the Congregational church Sunday said that his mother had been quite ill at her old home in Kansas, but is improving slowly. Mrs. Stone visited in Campbell this spring before returning east.

The ladies of the Moreland Good Will Club will give an entertainment at their hall Saturday evening, for the benefit of the families of the soldier boys at the border. Following a musical program, dancing will be in order till 12.

Walter Smith was renewing acquaintances and visiting his relatives, the J. E. Duncan family and connections for a couple of days this week. He was on his way with a party of friends from Imperial to Lassen county for a two week's vacation.

J. Enemark and family returned to Campbell Saturday after a 4000 mile auto tour through the south, Arizona and New Mexico. In this long trip they saw lots of territory but Mr. Enemark says that the Santa Clara valley is about the best all the year spot he has seen.

Lillian Gard celebrated her ninth birthday Friday afternoon with a party at which several of her young friends were present. Several interesting games were played, among them the ever popular "pinning on the donkey's tail," for which prizes were awarded. Tables were set out of doors which greatly appealed to the small guests.

Mr. and Mrs. H. C. Smith enjoyed a short visit Tuesday with friends from Fergus Falls, Minn., Col. and Mrs. Shonts and daughter, Mrs. Erickson. The Colonel has recently built him a new home in Palm Haven tract. They visited the J. C. Ainsley and Geo. E. Hyde plants and were quite impressed with the size of these industries here.

Prof. Petersen and his talented daughters—comprising the "Danish Musical Club"—will appear at the Congregational church Thursday evening, July 20th. These musicians were in Campbell last year and captivated everyone with their splendid programme. The ladies of the Congregational church are to be congratulated in securing them again.

Dorothy DeSelle was hostess at a birthday party Friday morning, it being her tenth anniversary. The children thoroughly enjoyed the occasion, it being quite a novel affair to attend a morning party. Those present were Elva Crawford, Lillian Gard, Leah Johnson, Dorothy and Redel Loomis, Lela, Minnie and Edna Ridley, Wilma Smith, Graham, Ivan, Carol, Ellis, Paul, Stanley, Raymond, and Melvan DeSelle. Mrs. DeSelle was assisted by Mrs. Dick DeSelle and Mrs. Roy Archibald.

Deer Plentiful

Camp Curry, Yosemite Valley. There are five times as many deer and bear in the Yosemite National Park this year as there were four years ago, according to the statement of Chief Ranger Townsley. The phenomenal increase in the number of friendly animals is due to the strict enforcement of the anti-firearms rule and to the merciless war waged against coyotes, foxes, mountain lions and other destructive animals by the park rangers. The campaign against mountain lions will be conducted with all possible vigor next winter, and Townsley says that by next summer there will not be a lion in the Park.

Deer are plentiful in the smaller canyons near Camp Curry, and parties seldom go out for the day without encountering half a dozen or more. One motorist counted fifteen deer along the automobile road between Camp Curry and Glacier Point.

Bear are likewise plentiful. Several come every night to feed at the bear pit near the lower end of the Yosemite floor, and on moonlight nights many tourists from Camp Curry and other resorts go down the Valley to witness the repast.

Most of the destructive blue jays in the Park have been killed by the rangers, and pigeons and other small birds are multiplying rapidly. A wholesale poisoning campaign has resulted in clearing out most of the ground squirrels, but attractive grey squirrels are now more plentiful than ever.

Fire Lads Elect

The fire company met Friday evening for its annual election of officers and transaction of other business.

E. E. Lanphear was re-elected chief in spite of protests and refusals, the boys simply declining to take "No" for an answer.

Ed. Genasci was also re-elected as assistant chief in compliment of his efficient services, and A. F. Bulmore and Louis Genasci were elected secretary and treasurer respectively.

The question of a bond election for the purpose of completing the apparatus and fire fighting facilities was discussed, and referred to the fire commissioners, E. G. Lanz, Dr. W. I. Merrill and L. M. Beall, who will take up the matter with the Supervisors as provided by law.

Home Burned

An unfortunate fire occurred Tuesday noon when the home of Andrew Goodall, with all it contained was burned to the ground. Mr. Goodall lived on Johnson avenue and conducted a small greenhouse and nursery business. Both Mr. and Mrs. Goodall are crippled with rheumatism and were unable to do much toward saving their belongings. Fred Smith and Warren Shelly were first on the scene and with other assistance saved a couple of trunks and a bed.

The hot-house with its connecting room was saved. Neighbors came to their assistance with clothing and provided sleeping quarters for the night.

No alarm was sent in to Campbell and no one here seemed to be aware of a fire. Some of the neighbors expresses regrets that they were outside the limits. Campbell really has no limits and the fire company stands ready to respond to calls within any reasonable distance, where there is a possibility of arriving in time to be of any assistance in saving furnishings or buildings.

Rise in Food Prices

The packing houses have sent out reports on the provision market which show that undoubtedly meat prices will continue to advance. The Belgian Relief Commission has purchased heavily of lard and bacon and the U. S. of bacon. The heavy hog run predicted for the month of June did not materialize, and packers have been unable to accumulate surplus stocks. The domestic demand is good while European countries are buying more than last year, as is also our own government.

Beans are the highest they have been in years. Small white navy beans are at 10¢ cents per lb.; large white, 10½¢; Bayous, 7½¢; pink, 7½¢; lima, 7¢; red 7½¢.

Heinze have withdrawn their beans from the market, and will sell no more until fall.

Mobilizing on the Mexican border has more than doubled the local demand on the stock of beans.

Mrs. J. C. Ainsley and Mrs. Wm. Shelly spent Saturday at Ben Lomond, and Miss Dorothy will go over this Saturday.

Messrs. and Mesdames E. K. Clendinning, H. C. Hutton and A. C. Keesling left Wednesday morning in their machines for Los Angeles and San Diego going the coast route.

Cheer Up!

Sugar is high, that's a fact, but next winter we'll all be hungry for fruit just as usual, that's sure. Perhaps we had better buy sugar for fruit canning and economize in something else.

Remember, we have to take the fruit in season. It's too late to change one's mind after the season is over.

So let's bring out the cans, and get some fruit, and buy some sugar and can what we can; and what we can't can we'll preserve, and what we can't preserve we'll jam; and next winter we'll be glad as can be that we canned fruit while it could be.

Now the Sugar, and Jars, and Cans, and Sealing Wax, and Wax Strings, and the Jar Tops, and Jar Rubbers, and Jelly Glasses and other things can be found at Blaine's.

SANI-FLUSH for cleaning closet bowls.

Keeps them sanitary.

KLEEN-A-PIPE instantly removes Grease, Paper, Cloth, Hair and Lint from sinks, tubs, drains and basins.

CEDAR-SWEEP, a dustless floor sweep.

BIRDS IN CEMETERIES

AUDUBON SOCIETIES INTERESTED IN BIG PROJECT.

Idea is to Have Burial Grounds Converted into Sanctuaries Where Feathered Friends of Humanity May Find Refuge.

More than a million acres of land will be added to the bird reservations in the United States if the National Association of Audubon societies, with headquarters in New York, succeeds in its campaign to have all the cemeteries of the country converted into bird sanctuaries. The plan includes not only the forty-eight burial grounds of New York city, but all cemeteries down to the lonely graveyard of the smallest hamlet.

"While the average visitor to cemeteries is frequently impressed with the song of birds," said T. Gilbert Pearson, secretary of the association, who has brought forward this plan, "this is due rather to the usual quiet and perhaps to the receptive mood of the person. The number of birds is really small compared to what it would be were but a little effort made. Much has been done to drive birds away from cemeteries. Frequently, there is not a yard of underbrush where a thrasher or vireo can build its nest. There are no pools or other means for the birds to slake their thirst. Tree surgery has closed the cavities whence titmouse, wren or bluebird formerly issued to console the lonely visitor. Fruit-bearing trees have been removed and there is an absence of berry-bearing shrubs, such as birds enjoy."

The association, in addition to the above needs, is urging the exclusion of gunners and cats from the cemeteries, the latter through the use of catproof fences. The placing of bird boxes in trees is recommended, as well as the construction of fountains or other drinking places for the birds. Food in the way of growing blackberries, strawberries or mulberries is suggested, while many cemeteries are said to have ample waste space where buckwheat and other small grain could be planted without detracting from the beauty of the landscape. The supplying of food in other ways as well as the provisions for nest-building are among other suggestions contained in a circular just issued by the association which, Mr. Pearson says, he will mail to all persons interested in having their city cemetery converted into a bird sanctuary. In Indianapolis thousands of birds find refuge in Crown Hill cemetery and birds of some varieties which generally go South in the fall spend the winter there.

Crossbred Yaks to Feed Alaskans.
No breed of dairy or beef cattle has as yet been found hardy enough to stand the winters in the interior of Alaska without excessive expense for food and protection against cold. As a result milk sells for 50 cents a quart and the beef that is consumed in the country consists almost wholly of cold storage meat brought from the outside. The Journal of Heredity says that the Alaska Experiment station has undertaken to relieve this situation by crossing the hardy Scotch Galloway cattle with the yak, an Asiatic ox much used by Mongolians, Tibetans, etc., for milk and meat as well as work.

The yak pastures through the winter under the open sky in Siberia and obtains feed from last year's grass dug from under the snow. Crosses of the yak with domestic cattle are common in Asia and highly successful.

Bear Caught in City.

A fat black bear, weighing nearly 400 pounds, was trapped and killed on the edge of the city limits near Cowen park, according to a dispatch from Seattle, and about one and a half miles from the university.

The downfall of bruin was brought about by two unknown men, who sold the bear while it was in the trap to A. Lampart, a butcher of Redmond, for \$20. According to the men who trapped the animal, it had established its headquarters on the hill near the Cowen Park ravine, and had apparently decided to spend the winter there.

The bear was in prime condition and had evidently found the back yards of Cowen Park residents fine foraging grounds.

Missed Big "Successes."

The death of George Edwardes recalls how he sold "Dorothy" for a song, and how a song—"Queen of My Heart"—made a fortune for the piece. The death of Lewis Waller recalls the case of "Monsieur Beaucaire." That play, when "tried on the dog" at Liverpool was a dead failure. The "dog's" verdict was wrong. Produced as a mere stop-gap at the Comedy, "Beaucaire" proved a big and instant success. It ran for some 400 times, and had the crowning triumph of a royal command performance at Sandringham.

That's What.

"What is a military success?" "A military success is a dog caught doing what he was bred to do."

EVERLASTING NAY PRODUCES
LAWLESSNESS IN CHILDREN

By SIDONIE MATZNER GRUENBERG

Mother, May I Take Off My Shoes and Stockings?

LAWRENCE came running up to the porch, where his mother and a visitor were sewing. Pausing long enough to satisfy the conventions, he asked breathlessly: "Mother, may I take off my shoes and stockings and go barefoot this afternoon?" The negative answer came short and sharp. Then Lawrence began to tease. "You let me Monday and last week," he reminded her. "I know I did," said mother, "but not this afternoon." There was no reason given, and none required, apparently. It was merely a question of having the last word. Of course, mother had the last word.

Lawrence took his departure, sulking and resentful. When he was beyond hearing the visitor asked: "Why didn't you let him go barefoot? You evidently don't object on principle, and there is nothing in the weather, and the ground is dry enough." The mother was not proud of her position. She had to confess that she had no good reason for objecting, only a lingering memory of the time Lawrence had cut his toe some weeks ago. But he had gone barefoot several times since; there really was no objection. But having said "No," she had to stick to it, had she not? "Perhaps," suggested the friend, "it's just a habit of denying children's requests because so many of them are foolish and unreasonable?" The mother admitted that probably it was.

NUNAMAKER IS HITTING HARD

Catcher Let Go by Boston Red Sox is Proving Valuable Man for Manager Bill Donovan.

Leslie Nunamaker, the catcher of the New York Americans, has been a real batting sensation to date. Nunamaker was let go by the Red Sox to the Yanks and has proved a valuable

Leslie Nunamaker.

man for Bill Donovan. His work with the stick has been gilded so far this season. If he keeps up his slugging it will be hard work to keep the team from the top, with the other strength it has acquired this year.

Many People in This Strange City Never Saw the Light of Day

In Galicia there is one of the most remarkable underground cities in the world. It has a population of over a thousand men, women and children, most of whom have never seen the light of day.

It is known as the City of the Salt Mines, and is situated several hundred feet below the earth's surface. Its being is due to the greatest salt mine in the world, which, though it has been mined for many generations, seems inexhaustible. The city has its town hall, church, theater, and assembly room, all made from the crystallized rock salt. It has long, wide streets and big squares, lighted by electricity.

There are numerous instances of families in this underground city where not a single individual in three generations has seen the sun.

Again and again, in your intercourse with children, you will find it advisable and necessary to say "No." Well then, say it; and stick to it! The great problem is to say "No" nine times and then be still able to say "Yes," if need be, the tenth time. In other words, we must avoid getting the habit of giving children any stereotyped answer. Every request and every question must be met with the freshness of a new situation and treated on its merits. Only thus can we expect to retain the children's confidence in our judgment and in our reasonableness.

Although we hate the idea of bulldozing the young children, we get the habit of saying "No" before considering the merits of the request. Notwithstanding our chagrin on being nagged again and again into making concessions to our children, we get the habit of saying "No." However much we may regret it the moment after, we obey that impulse and still say "No."

Again and again, in your intercourse with children, you will find it advisable and necessary to say "No." Well then, say it; and stick to it! The great problem is to say "No" nine times and then be still able to say "Yes," if need be, the tenth time. In other words, we must avoid getting the habit of giving children any stereotyped answer. Every request and every question must be met with the freshness of a new situation and treated on its merits. Only thus can we expect to retain the children's confidence in our judgment and in our reasonableness.

MOTHER'S COOK BOOK

Chicken Broth.

To make nice chicken broth scrub the chicken in warm water to which a teaspoonful of soda has been added, using a vegetable brush for the scrubbing. Wipe dry and cut in small pieces, cover with cold water and bring slowly to the boiling point, let simmer for five hours, strain and when cool, remove the fat. This will form a thick gelatine when cold and will keep for some time in a cool place. Barley boiled soft may be added to this soup, or rice makes a pleasing variety.

Chicken Custard.

Take a half cupful of strong chicken broth, a half cupful of rich milk, one egg and a yolk of an egg, salt and pepper to taste. Beat the egg, add the seasoning and strain into two small cups. Set the cups into a pan of hot water and bake until firm in a moderate oven. This recipe will be easily doubled to serve four or more. Serve either hot or cold.

Tomato Soup.

Cook half an onion cut in thin pieces, half a carrot and two stalks of celery, cut fine in two tablespoonfuls of butter until yellow and softened; add a can of tomatoes, two more stalks of celery, a spice bag and a quart of water. Let simmer 20 minutes, then strain. Reheat and thicken with two tablespoonfuls of cornstarch smoothed in water, cook until well cooked. Season with salt, paprika and green or red peppers cut in strips.

Cheese Souffle.

Select fresh soft American cheese, cut in small pieces and measure a cupful. Melt over hot water, add a cupful of heated cream, take from the fire and stir until the cheese is well mixed and smooth. Cover a cupful of bread crumbs with one cupful of milk and let stand for half an hour. Add to the beaten yolks of two eggs and add this to the cheese. Season to taste with salt and paprika, butter the ramekin dishes and fold in the whites of two

eggs beaten stiffly. Fill the ramekins and bake for 15 minutes in a medium oven.

Triplex Soup.

Use equal quantities of beef, lamb or mutton and veal, add a pint of water to each pound of the meat. Cut the meat in small pieces, adding the bones, then cover with cold water and simmer for four hours. Strain and season with salt. Cool to remove the fat before serving.

Nellie Maxwell

Fashion's Decrees.

A simple bodice is finished around the bottom with three tiny ruffles, the ruffles also appearing at the bottom of the sleeves.

Children are wearing hats with very wide brims.

Some of the pocketbooks seen are very long and narrow.

Silk jersey is used for afternoon dresses.

Nearly all the latest corsages fasten in the back.

Ribbon trimmings adorn the newest sports hats.

For Her Coiffure.

Much attention to the tresses is paid these days.

To wear smart hats one's hair must be fashionably arranged.

For evening occasions there are many beautiful hair ornaments.

The fan-shaped Spanish comb is quite the vogue just now—it suits the new high form of dressing the hair.

Fascinating little winged and flower effects, worked out in rhinestones on imitation shell, may be worn with the hair high or low.

IT MADE A DIFFERENCE

Pointed Paragraphs.

Some people think anything tiresome that is a duty.

It's easy for a man to get married if he doesn't want to.

Some women have a mania for collecting marriage certificates.

A woman can believe only half she hears when she so chooses.

Most of us believe in everlasting punishment for our enemies.

GIRLS TRAINED IN BUSINESS
SUCCESS IN HOME FINANCING

By JOHN M. OSKISON.

Forty-four girls recently completed a course of training in an association supported by New York department stores. They are the pioneers of a new idea.

In establishing this training school the store directors broke away from the old theory that since the store girl was not expected to stay permanently at work, but would get married, nothing beyond "welfare" work was fitting in her behalf.

Under the new plan the girl is to make a serious study of department store employment. She is to find out what elements enter into the success of the particular department in which she works. She is to know costs and efficiency in handling goods; she is to be trained to look upon her job as one leading to promotion.

From such a store experience, based on the new training, the girl who marries will go into the home with the purpose to study its economic problems and make it a financial success.

The Emerald Isle

IN A KERRY VILLAGE

THE historical and political importance of Ireland has created in the minds of many Americans an exaggerated idea

of the island's physical proportions and the density of its population, two vital factors in England's task of suppressing the rebellion which had its inception in the capital and largest city, Dublin. According to the National Geographic society's bulletin the whole of Ireland embraces an area slightly less than the state of Maine, but with a population almost six times as dense. In comparison with the governing country, it is three-fifths as large as England and Wales, with one-ninth the population.

The island is one of the very few sections of the civilized world where the population has shown a marked decrease during the last century. The first census of the island, taken in 1821, recorded a population almost 50 per cent larger than at the present time, while the census of 1841 showed the high-water mark of more than eight millions, nearly twice the present population of 4,375,000. This remarkable decrease, due largely to emigration, began after the famine brought about by the destructive disease which attacked the potato crops of 1845. This calamity resulted in the withdrawal of more than a million acres from cultivation within two years. Incidentally the potato, which has played such an important role in the life of Ireland during the last 300 years, is not indigenous to the island, but was one of the food gold mines discovered by the Spaniards in their conquest of Peru. The country is directly indebted to Sir Walter Raleigh

gated by large steamers for half its length, and is connected with Dublin by means of the Grand and Royal canals.

Although coal is found in most of the 32 counties into which the island is divided, and there is considerable iron ore, mining is not an important industry. Gold was being mined in a modest way in County Wicklow at the time of the rebellion of 1798, but the works were destroyed and the source of the metal has never been re-discovered.

Industries of the Island.

Agriculture and stock raising are the chief occupations of the inhabitants. At one time the woolen manufactures of the island were formidable rivals of English factories, but hostile legislation gave the industry a check from which it has never recovered. As the Irish have raised flax for centuries the manufacture of linen early became one of the important industries of the country. Irish whisky is an important article of export and one of the largest breweries in the world is located at Dublin. The island's production of beer is three and a half million barrels annually.

Shipbuilding in the great yards at Belfast is one of the most widely known of Irish activities, and the deep-sea and coast fisheries afford a livelihood for many thousands.

Thanks to the temperate influence of the west winds from the Atlantic, the thermometer rarely reaches freezing point in winter, while the average for a summer day is 60 degrees. At Toor Head on the north the distance to Scotland (Mull of Cantliri) is only 13½ miles. The Giant's Causeway, a short distance to the east of this point, is the outcropping basaltic formation which in a former age joined the two islands.

NOT THE OLD MONTE CARLO

War Has Had Decided Effect on the Great Gambling Resort of Europe.

The noonday train draws slowly into the station. A flood of passengers pours forth, writes a Monte Carlo correspondent of the London Times. Leaving the station, the crowd surges up into the marble steps and skirts the vast edifice which crowns the abrupt hilltop; it is soon swallowed up within the portals of the great building. It is a shabby, dowdy crowd, mostly women.

Can this be Monte Carlo? Can this crowd be hurrying so feverishly to the gaming tables?

The sunshine is benignly warm, the soft breezes fragrant with the mingled scent of a thousand flowers. Yet the terrace is deserted. Now and then a black figure passes hurriedly and disappears into the casino, without lingering for an instant to enjoy the magic beauty of the scene.

I make my way slowly to the casino. The doors of the gaming rooms are thrown open by the familiar frock-coated attendants. In the gloom-filled halls a somberly dressed crowd is clustered about the gaming tables. I go up to the first roulette table. The players seem to be chiefly housewives and shopkeepers of the lower middle class, recruited apparently from among the natives of the neighboring towns. Officers and men of no matter what rank of all the allied armies, whether in uniform or not, are rigorously excluded. Today 80 per cent of the players are women, unlike the old clientele; plain bourgeois and peasant types of faces abound.

The glitter and brilliance of the multitude who gathered here in former days has disappeared. The gold coin that shone so lustroly against the green baize of the gambling tables has vanished. The atmosphere of bacchic beauty of this enchanted landscape, of these hanging gardens which rise tier upon tier above the sea, of this environment of sensuous splendor which made of Monte Carlo a pagan sanctuary unique in the world, has faded away. Can it be otherwise when the temple of Janus stands open?

TORC CASCADE

for its "Irish" potatoes, as it was he who brought them from what is now North Carolina and planted them on his estate near Cork in 1585.

Mountains, Bogs and Lakes.

Ireland lies on the western rim of what was once a part of Continental Europe. It has numerous mountains, the highest being the McGillicuddy Reeks (3,414 feet), in the Killarney region, but there is no mountain chain or elevated "backbone." There is a more or less well-defined central plain, however, the distinguishing feature of which is its bogs—the black bog producing the famous peat fuel, differentiated from the brown bogs of the mountains. If the whole island were brought to a mean level it would rise 400 feet above the sea.

The lakes, or loughs, of Ireland are among its most widely appreciated physical characteristics, their scenic beauty being the inspiration of poets, painters and musicians. Nor have the Irish rivers been overlooked in appraisals of the island's beauties. The Shannon, which flows for 250 miles from the county of Cavan in the northwest to the Atlantic in the southwest, is the longest water course in the United Kingdom. It is navi-

DAISY FLY KILLER placed anywhere, attracts and kills all flies. Neat, clean, ornamental, convenient, cheap. Lasts all season. Made of metal, can't tip or tip over; will not soil or injure anything. Guaranteed effective. Sold by dealers, or sent by express prepaid for \$1.
HAROLD SOMMER, 250 DeKalb Ave., Brooklyn, N. Y.

DEFENSE OF THE FAIRY TALE

Writer Points Out Its Importance in the Scheme of Education of the Child.

Ignorance of fairyland is the punishment of intellectual vanity—the vanity of the average pedagogue, who has forgotten that education means leading forth and not stuffing in.

It is the vanity of the physiologist who, forgetting that the germ-plasm is a faculty of influence and enterprise, not an arrangement of molecules, thinks to create it in a test-tube.

It is the vanity of the eugenicist who believes he will improve upon those ancient ways of life which, for a few ages before Mendel and Weissmann, managed, all untutored, to evolve a reverent man, something more marvelous than these modern academic things who seem so ignorant of their native virtues.

To the fairy tale we must often look, if we are to mend our ways with the child and lead him forth to find that mighty world, that true self, which is the idea of him laid up in the heart of God.—New York Telegram.

CAD and BELLS

LEAST WORRY OF WATCHMAN

Keen, But Subtle Reproach Conveyed to Inquisitive Visitors at Ruins of Wellesley College.

A merited retort is not always a retort courteous. The rebuke that was administered to a party of intruding tourists by the old watchman who was set to guard the ruins of College hall at Wellesley not long after the great fire conveyed a keen but subtle reproach.

"Ye've got to keep out!" he ordered gruffly, when he caught them trying to slip under the ropes that surrounded the crumbling walls.

The inquisitive visitors paused and eyed first the ruins and then their determined guardian.

"See here," a callow youth accosted him, "we're willing to risk it, and we'll take all the responsibility. What do you care if we lose our lives?"

"Ye've got to keep out. I ain't thinkin' of your lives; I'm thinkin' of me job."—Youth's Companion.

The Woman of It.

Mrs. Church—So your daughter's to be married tomorrow?

Mrs. Gotham—She is, I am glad to say.

"And is the groom a man of your choice?"

"He certainly is not."

"Why are you glad she is to be married, then?"

"Well, I just feel like having a good cry."

They Had Cut Him Down.

One day, in the lively old time of cowboy activities, a timid tenderfoot at Bitter Creek asked tremblingly if that bad man, Bill Busher, was hanging around there yet.

"No," replied the native who was asked. "But he was last week."

"Are you sure?" said the tenderfoot. "Positive. I had hold of the rope."—Browning's Magazine.

Shooting Up the Town.

Bill—I see for lighting gas burners an inventor has patented a pistol in which a spring shoots a rod of flint through a roughened steel ring, producing a shower of sparks.

Jill—If it is adopted for street lighting I suppose it will be said at eventide that it is about time for the lamp-lighter to shoot up the town.

An Economy.

"No money, no trunks," said the irate landlord. "If you don't pay your board bill we hold your trunks till you do."

"Splendid!" said Dedbrooke. "That'll save me the expense of storage on these things of mine until next season. y-by, old man!"—Judge.

NOT FOR HIM.

Mr. Elephant—I have a mind to hire you as my valet.

Mr. Monk—What, and have to carry your trunk around for you all the time? I guess not.

Proper Thing.

"They tell me Smith's business has all gone to seed."

"Poor fellow! Then he's ruined."

"Far from it. He supplies the farmers and suburbanites all around."

Their Status.

"English candidates for parliament are a sort of strap-hanging class, aren't they?"

"How do you mean?"

"Don't they stand for a seat?"

Very Cruel.

He—When I went to the hospital they put the X-ray on my head, but they couldn't find anything there.

She—Ah! Did they expect to find anything?

CALOMEL MAKES YOU SICK, UGH!

"Dodson's Liver Tone" better than calomel and can not salivate.

Calomel loses you a day! You know what calomel is. It's mercury; quicksilver. Calomel is dangerous. It crashes into your bile like dynamite, cramping and sickening you. Calomel attacks the bones and should never be put into your system.

When you feel bilious, sluggish, constipated and all knocked out and believe you need a dose of dangerous calomel just remember that your druggist sells for 50 cents a large bottle of Dodson's Liver Tone, which is entirely vegetable and pleasant to take and is a perfect substitute for calomel. It is guaranteed to start your liver without stirring you up inside, and can not salivate.

Don't take calomel! It makes you sick the next day; it loses you a day's work. Dodson's Liver Tone straightens you right up and you feel great. Give it to the children because it is perfectly harmless and doesn't gripe.—Adv.

AS NAMED IN HAWAII

NOMENCLATURE OF THE NATIVES SINGULARLY PICTURESQUE.

Mrs. Oyster, Atlantic Ocean and Stomach Are Examples—Male Infant Christened "Mrs. Tompkins," Girl Named "Samson."

The natives of Hawaii are singularly picturesque in their choice of names. Mrs. Scissors, The Thief, The Ghost, The Fool, The Man Who Washes His Dimples, Mrs. Oyster, The Weary Lizard, The Husband of Kaneia, (a male dog), The Great Kettle, The Nose, The Atlantic Ocean, The Stomach, Poor Pussy, Mrs. Turkey, The Tenth Heaven, are all names that have appeared in the city directory.

They are often careless of the gender or appropriateness of the names they take. A householder on Bereania street, Honolulu, is called The Pretty Woman (Wahine Malkai); a male infant was lately christened Mrs. Tompkins; one little girl is named Samson; another, The Man; Susan (Kukena) is a boy; so are Polly Sarah, Jane Peter and Henry Ann. A pretty little maid has been named by her fond parents The Pig Sty (Hale Pua). For some unknown reason—or for no reason at all—one boy is named The Rat Eater (Kamea Oi i Ole).

Reverend Doctor Coan of Hawaii possessed the love of his flock. One morning a child was presented for baptism whose name was given by the parents, Mikia; when the ceremony was finished the parents assured the doctor that they had named the baby for him.

"But my name is not Michael," said the doctor, supposing Mikia to be aimed thereat.

"We always hear your wife call you 'Mikia!'" answered the mother. She had mistaken Mrs. Coan's familiar "my dear" for her husband's given name.

An old servant in Doctor Wight's family, at Kohala, caused her grandchild to be baptized in church. The doctor (Kauka); that was its only name. By way of compliment to the early physicians, many children were named after their drugs, as Joseph Squills, Miss Rhubarb, The Emetic, The Doctor Who Peeps in at a Door.

Names uncomplimentary, or even disgusting, are willingly borne by their owners; others convey a pleasing and graceful sentiment. Among the latter are the Arch of Heaven (Ka Ria Lani), The River of Twilight (Ka Via Lilia), The Delicate Wreath (Ka Lei ma Lili). The name of Liliu O Kalani, the queen now in retirement, means A Lily in the Sky.—Youth's Companion.

General Trend.

"Those chorus girls can dance."

"Yes, you see some rather scientific dancing among chorus girls these days."

"Quite so. In the chorus, as well as in the prize ring, science seems to be supplanting beef."

LOVE ALWAYS FINDS A WAY

Liver and Onions, or a Struggle Between Love and Appetite—Letter Was Written First.

That night, 600 miles from home, in the dining room of the Travelers' Retreat, Higginson Bukettshop battled long and bravely with his appetite.

He hadn't written Clarabelle the daily letter yet, and all the hotel offered for supper was liver and onions, onions and liver, and liver as well as onions.

"What shall I do?" moaned the unhappy man. "I am famished, yet how can I send Clarabelle my usual kiss at the end of the letter after eating those onions? She will be sure to detect them—she is so sensitive—and then the engagement will be off."

Meanwhile the waiter was standing patiently at his elbow, remarking, "De liver'n onions is very good, sah. De onions'n liver is right toler'ble, sah."

"Hang it all, was ever man in such a fix!" cried Higginson Bukettshop. "Love or liver? Onions or Clarabelle?"

Suddenly his handsome face lit up. "Liver and onions!" he ordered.

"By suspenders, I'll send the letter before I eat!"

And, though the letter was unusually impassioned, he had finished writing it, kiss and all, before the liver and onions arrived.—Detroit Free Press.

Plain Diagnosis.

"Now, doc," said the patient who wasn't so very sick, "I want you to get me a nurse. What I want is a nurse with golden hair, blue eyes, pretty figure and melodious voice."

"You don't want a nurse," retorted the doctor with some authority. "What you want is a front seat at a musical comedy."

BRITISH BUSINESS METHODS.

"Has your son brought back any business methods from London?"

"Oh! yes. He thinks we ought to serve tea afternoons and that all the stenographers ought to be blondes."

Overlooked.

"Are you the editor of the paper?" asked the lady with the drab spats, calling.

"I am," replied the man with the poised pencil.

"Well, I called to ask if you wouldn't get larger type. My name was in your paper five times last week and a neighbor of mine told me she never saw it."

Nobody Loves a Fat Man.

Biggins (a man of abundant girth)—The doctor said I need iron.

Badger—Internally?

Biggins—What a question! How else?

Badger—I didn't know but he meant externally in the shape of a hoop or two.

Not Easily Swallowed.

Bacon—This paper says a camera small enough to be swallowed to photograph the interior of the stomach has been invented by a Danish surgeon.

Egbert—Do you believe it?

"Certainly I believe it."

"Well, some people will swallow most anything."

Then He Ducked.

Mrs. Bacon—I see it is said that many of the women of Chile are employed as car conductors.

Mr. Bacon—Never would do over here.

"Why not? I'd like to know."

"Why, the rear platforms are crowded enough already by men."

Man of Excuses.

Mr. Crimsonbeak—How long do you suppose it would take to come from the moon to the earth, dear?

Mrs. Crimsonbeak—I don't know and, what's more, I don't care; but if you are going to give that as your excuse for getting home late last night, it won't go."

Perhaps.

Mollie—I see an English inventor has equipped his flying machine with an acetylene flare, which would burst into flame and form a signal should he fall into the sea.

Chollie—But wouldn't that frighten the fish?

His Rank.

"I suppose the man who has charge of the coining of 25-cent pieces has an army rank."

"What army rank could he have?"

"That of quartermaster."

Fine Cut.

"I certainly like the way our new cook prepares spaghetti."

"How's that?"

"She runs it through the meat chopper first."—Judge.

A Famous Physician's Wonderful Discovery

After a series of careful experiments and tests at the Invalids' Hotel and Surgical Institute, Buffalo, N. Y., covering many years—Dr. Pierce, the medical director of that hospital made an announcement that he could prove that a medicine which he called "ANURIC" was the best uric acid solvent now to be had. As a remedy for those easily recognized symptoms of inflammation—as scalding urine, backache and frequent urination, as well as sediment in the urine, or if uric acid in the blood has caused rheumatism, lumbago, sciatica, gout, it is simply wonderful how quickly "Anuric" acts; causing the pains and stiffness rapidly to disappear. Swollen hands, ankles, feet are due to a dropsical condition, often caused by disordered kidneys. Naturally when the kidneys are deranged the blood is filled

with poisonous waste matter, which settles in the feet, ankles and wrists; or under the eyes in bag-like formations.

It is just as necessary to keep the kidneys acting properly as to keep the bowels active.

The very best possible way to take care of yourself is to take a glass of hot water before meals and an "Anuric" tablet. In this way it is readily dissolved with the food, picked up by the blood and finally reaches the kidneys, where it has a tonic effect in rebuilding those organs.

Step into the drug store and ask for a 50-cent package of "Anuric" or send Dr. Pierce 10c. for trial pkg. "Anuric"—many times more potent than lithia, eliminates uric acid as hot water melts sugar. A short trial will convince you.

MOST BEAUTIFUL WORD

CHOICES MADE BY STUDENTS OF DIFFERENT AGES.

Some of Them Are Interesting, Pothetic, and Some Amusing—College Professor Gives Result of His Investigations.

What is the most beautiful word in the English language? A college professor, who has been teaching for a number of years, has collected some interesting facts concerning the preferences that schoolgirls and schoolboys entertain for certain words. He has made the experiment with some 20 classes, all the way from an ungraded class in a country school to the senior class in college.

At the conclusion of a recitation the teacher has had little slips of blank paper distributed. He has then requested each pupil to write down—without consulting his neighbor—what he thought the most beautiful word in the English language, giving consideration both to sound and to sense.

Of the 600 pupils that he has had, 405 wrote the name "mother"; 82 wrote "home"; 22, "father"; 18, "daddy"; 16, "vacation"; 11, "baseball"; 9, "football"; 7, "love"; 3, "sister"; 2, "aunties"; and 2, "grandmother." The following words received one vote each: "Grandpa," "vesper," "moonlight," "hope," "rose," "hyacinth," "angel," "music" and "swimmin' hole."

Of the remaining 14, one, a response from a very bright boy, puzzled the professor. That boy wrote "cellar door." When asked about it, he pronounced it "cellar doah," and explained, "Oh, it just sounds pretty."

The other 13 ballots, all for the same word, amused and perplexed the professor. They were all handed it at the same time from a class of 29 healthy, growing, hard-working country boys. There was, the teacher insists, no opportunity for collusion. The ballot was taken silently. Each ballot was then folded and dropped into a hat that the teacher asked one of the boys to pass around.

Those 13 citizens-to-be deliberately wrote down the ugly-sounding, greasy-looking, thoroughly unattractive word "victuals." What could have been more suggestive of that teacher's opportunity than the fact that nearly half of a class of 29 immortal souls thought "victuals" the most beautiful word in the English language?

And what higher compliment could be paid to motherhood and the American home than the fact that 527 of these 600 boys and girls, young men and young women, independently, and at various times and places, selected words that suggested family relationship as the sweetest words in their language?—Youth's Companion.

Something New in Knives.

Every device which helps to make housework easier should be welcomed, and one of the best things that have been invented in this connection is the new stainless steel. Knives made of it have not to be cleaned in the old way; they merely have to be wiped and ought soon to be in universal use. Here is a paragraph from a trade paper:

"Sheffield appears to have made up its mind that stainless cutlery has come to stay, in spite of the fact that it is appreciably dearer than ordinary cutlery."

This stainless cutlery is said to last three times as long as common steel, but as yet it has not been placed generally on the market.

His Third Set.

From the state of Indiana comes a story about a Civil war veteran who is getting his third set of teeth. He is seventy-five years old, and declares that he never had a dentist remove any of his teeth, but "just naturally allowed them to wear out." When his gums began to hurt a few months ago he supposed he had a case of neuralgia due to decaying dentals, but slowly the roots of the ancient teeth began to be forced to the surface, and now Jacob Hays has four brand new teeth and others are on the way.

Dentists do not know whether any one but a veteran of the war could grow three sets of molars or not.

Decline in Status.

"I heard Mabel say when she was engaged that she had selected the very flower of her admirers. I wonder what particular one she likened him to?"

"Well, when they were first married, she considered him the very pink of perfection, but now the baby has put his nose out of joint, he's just a plain poppy."

Under False Pretenses.

Many persons are under the impression that America has few, if any, native plants worthy of cultivation in the home garden. They have been accustomed to look upon them as weeds and wild things, and so unfamiliar are they with native flowers that they fail to recognize them when they meet them outside their native haunts. A writer tells how he transplanted a stalk of goldenrod from a fence corner in the pasture to a place in his garden. It flourished luxuriantly, and sent up many stalks as high as a man's head, each crowned with a great plume of brilliant flowers.

A neighbor was attracted by the beauty of the plant, and declared it must have cost its owner some dollars. When told, however, that numbers of the same plant were flourishing behind his barn, he exclaimed: "What! You mean to tell me it's yallerweed!" And he went away with the air of one who had been imposed upon.—Country Gentleman.

One Way to Make a Friend.

There are several kinds of hypocrisy, but the one that masculinity most favors is spurious devilishness. Nothing brings the beam of contentment so fervently to the mediocre eye as a Don Juan accusation. Dig him in the ribs and wink as you call him a sly dog—and he loves you. He may be the quintessence of domestic respectability, but if you will but insist that you believe him capable of maintaining a seraglio with consummate deceit, you are his friend.

Dr. Pierce's Favorite Prescription makes weak women strong, sick women well, no alcohol. Sold in tablets or liquid.

Fatted Calves.

Boulder—I wonder why we see so many more artificial limbs nowadays than we did when we were boys?

Making the Little Farm Pay

By C. C. BOWSFIELD

Modern dairy owners having over-
come by means of slage the disastrous
effects of summer drought it is now
worth while for all farmers to take up
the question of irrigation.

This country is fast reaching the
level of \$200 land, and every agency
that can aid in making the higher
priced farms pay must receive atten-
tion. Irrigation is not commonly un-
derstood by farmers living east of the
Rocky mountains, and they have look-
ed upon its marvelous results as some-
thing belonging exclusively to the fron-
tier. The fact is, however, a regulated
water supply is needed on every farm,
and in the absence of a public system
of irrigation individual or co-operative
action is called for.

There is no surer method of making
a farm pay than to irrigate it. The
Budlong place of 700 acres in Cook
county, Ill., is both watered and drain-
ed by means of the drainage canal,
and the system pays well in the enor-
mous crops of vegetables which are
regularly produced.

Water from the drainage canal is
pumped into ditches which border the
big farm. When these ditches are full
the water flows through ordinary

AN IRRIGATED SMALL FARM.

drainage tile to all parts of the prop-
erty, and crops are thus supplied with
moisture through the roots instead of
from the surface. To drain the farm
after a heavy rain or when enough wa-
ter has been supplied it is only neces-
sary to open gates and allow the ditches
to empty into the canal.

In thousands of cases farmers who
have ponds or streams can have a
cheap and effective irrigation system
on the Budlong plan. Others can
build small reservoirs or dams on the
highest part of their farms and irri-
gate either by surface ditches or
through tiling. The expense will
range from \$1,000 to \$3,000 on ordi-
nary farms for constructing a suitable
reservoir. Drain tiles are needed, any-
way, and this item of expense is not to
be charged entirely to irrigation.
Where a pond or other body of water
is so situated that a stream can be
run to the highest point in a field irri-
gation becomes a simple matter, or if
water can be pumped into ditches or
furrows the proposition is easily and
cheaply handled. Light furrows about
eight or ten feet apart will serve to
carry the water through the fields and
down the slopes. This plan requires
that the furrows be kept full until the
ground is thoroughly soaked. In a pe-
riod of drought this operation is to be
repeated from time to time. In all
surface irrigation it is important that
the soil be well cultivated as soon as
the water has been absorbed to pre-
vent the formation of destructive
crusts.

Kansas has installed the first irri-
gation plant owned by that state under a
law passed by the last legislature ap-
propriating \$125,000 for experimental
irrigation work. The plant consists of
six modern windmills furnishing pow-
er and six four-inch cylinders, which
lift the water into a reservoir 100 by
150 feet and six feet deep, made of
dirt. In making a reservoir the top
soil is removed and the sides banked
with dirt from adjoining land. After
dragging and puddling the reservoir is
left to hold water. After the reservoir
has been filled the floodgate is opened
and the water carried over the fields.

It is feasible to construct smaller
reservoirs at high points on a farm.
Generally it will pay to construct a
concrete bottom. Ditches or furrows
leading from this irrigate the crops in
the simplest and cheapest manner
known to man. The matter of keep-
ing the reservoir supplied is one that
each farmer can study out to suit his
own circumstances. In some cases a
windmill will serve the purpose, or a
small engine can be used for pumping
the water. These are cheap methods,
but they are practicable and enable
the landowner to regulate the mois-
ture which his crops require.

There is no doubt but that a simple
form of irrigation will pay any farm-
er. Crops are doubled in extent and
improved in quality by a regular water
supply, which is best worked in con-
nection with a drainage system.

ONE most vitally important item in the railroad proposed strike
situation is the matter of pensions which has been adopted by a num-
ber of railroads. By this system, the company grants a life pension to
employees who have been with the company a prescribed term of
years for faithful and unbroken service. This is about to be nullified
with a great many old service men if the strike is voted and the men
walk out, for in walking out they have voluntarily severed their connec-
tions with the company and forfeited their credit of time. If these older
men see the point clearly they will vote against the strike and do all in
their power against it, and stay on the job even if others do strike.
With many this pension will be all they have to live on after their
years of service are passed.

IT has been rather warm. In fact some days are hot ones, but
just keep cool. There are others. It gets so hot in many other places
that people die because of the heat. Seven died in the East Wednes-
day. Altho hotter in degrees here, man can stand it and deaths rarely
occur in California because of the heat, and heat puts sugar in the
fruit. So smile, durn ye.

THE germophobists should note that Dr. Waite tried the bacteria
of diphtheria, pneumonia, typhoid fever and other varieties of germs on
his father-in-law without producing any ill effects. Which only goes
to show that a healthy man has no occasion to be always afraid of
catching and letting them go all the time.—Ex.

THE land area of the earth is estimated at 55,500,000 square
miles and its total population 1,600,000,000. The area of the countries
at war is 32,000,000 square miles and their population nearly 1,000,-
000,000. This means that considerably more than half the world is at
war.

IT is estimated that Alaska has enough coal to supply the world
for the next 300 years. A very fine reserve, but Alaska would like to
be permitted to draw a little upon her coal capital.

Interesting Travelogue

The members of the Johnson Avenue
Improvement Club and friends enjoyed
a most delightful treat at the home of
Mr. and Mrs. H. W. Higbie Monday
evening.

Mrs. Higbie, who had just returned
from the east, gave a very interesting
account of her travels, adding those lit-
tle personal touches at which she is so
adept. Most of her talk was about her
delightful trip to Porto Rico, describing
the natives and their customs, and cane
and pineapple culture. While there she
purchased a number of fine Spanish lac-
es and other pieces of hand work and
curios. A service of ice cream and cake
followed.

The Club is planning a lawn party for
the early fall.

R. R. To Be Lowered

Within a few days, possibly early next
week, the San Jose railroads will start
the work of lowering its tracks on the
Alameda from the city limits of San Jose
to the city limits of Santa Clara to the
new official highway grade. This was
made certain when F. E. Chapin, man-
ager of the railroads, went to Los Angeles
for a conference with higher officers on
the question of raising the money for the
work, which will cost in the neighbor-
hood of \$100,000. The undertaking is
the last of a series due to changed street
grades, which will have cost the railroad
company close to a quarter of a million
dollars when completed.

Chapin is expected back from Los
Angeles tomorrow night or early Friday
with the official "O. K." on his plans
for lowering the grade. Just before he
left he refused to authorize a statement
that he intended starting the improve-
ment of the street, but from another
source it was learned that the trip was
for the purpose of financing the work.

I. O. O. F. Installation

District Deputy Grand Master Vaughn
Lloyd and suite installed the following
officers of Morning Light Lodge I. O. O. F.
at Campbell Thursday evening of last
week:

F Coupland N G.
Ben Dalvit V G.
W L Emler Warden.
H Griffin Conductor.
R Sholz R S N G.
C Berry L S N G.
J C Harris Chaplain.
W R Coupland R S V G.
J D Sawyer L S V G.
N A Blake R S S.
Chas Townsend L S S.
Herb Sholz I. Guardian.
Claude Grizzle O. "

Deputy Lloyd and suite installed the
officers of the Los Gatos lodge Tuesday
evening, a number of the local Odd Fel-
lows going up for the aftermath.

Happiness.

Happiness is the shortest distance
between two disappointments. It is
the background of hope, the reaction
from despair and the illusion of for-
getfulness.

Happiness is the brief moment after
something attained. It is something
we remember to have had after it has
gone.

Happiness is what we often envy in
others, who make us think they have
it. It is a transient in the house of
your mind who is gone before you
have shown him to his room.

You are always waiting for his com-
ing. When he comes you never know
how to treat him.—Life.

Local and Personal

For Sale—New 12x14 tent. L. Rey-
burn, 51 Rincon avenue, Campbell.

FOR SALE—Well made, good sized
work bench, with vise and dog, \$2.75.
Enquire at this office.

Messrs and Mesdames J. F. Duncan
and Easton Carter returned today from
their ten day auto trip to Lake Tahoe.

Men's and Boy's Elk Skin Shoes.
Men's \$2.50 and \$2.75 Boy's \$1.75,
\$2.00 and \$2.25.

E. E. SOWER.

Mrs. Parks and daughter, Miss Parks
left Monday for their home at Cleveland,
Ohio. They have been here about four
months with Mrs. Parks' sister, Mrs
Jane Hinde.

Friends in Campbell learned Wednes-
day that Miss Ruth Lloyd, who was at
Asilomar for the E. L. Institute, had been
taken to the hospital at Pacific Grove for
an operation for appendicitis.

Miss Mary Clark has been elected to
teach the fifth grade at Willow Glen
school next term. Miss Clark is spe-
cializing in work at the University
summer school at Berkeley.

D. R. Oliver, formerly one of Camp-
bell's hustling ranchers, was here from
Merced last week for a few days. He
went on to Santa Cruz where he is
spending a vacation with his son, Will.

Claude Townsend who has been tour-
ing Arizona and New Mexico with the
j. Enemark family returned home Sat-
urday. Claude has taken on about four
shades of Mexican tan but otherwise
looks fine.

Mr. D. O. Hawkins of Fresno, who
visited his friends, Mr. and Mrs. W. T.
Morton, here, dropped dead of heart
failure at Fresno last week. Mr. and
Mrs. Morton motored over to attend the
funeral Saturday, returning Tuesday.

Work on the new domestic science
department of the High School is pro-
gressing rapidly and the four walls and
roof are practically closed. A number
of the student carpenters are on the job
and are getting some real practical ex-
perience.

Open Grange will be held at Camp-
bell, Tuesday, July 25, for the purpose
of beginning the canvass for members
for the Prune and Apricot association.
Prominent speakers and organizers will
be present and a large attendance is
hoped for.

Enough money has been pledged for
the completion of the county Y. M. C.
A. organization. A temporary meeting
of the county committee was held in San
Jose yesterday, the Rev. G. E. Atkinson
and Ralston Alison representing Camp-
bell community.

The Pulpit Supply Committee of the
Congregational church is to be congrat-
ulated in securing Rev. J. K. Browne of
Harpoet, Turkey, for Conference, Sun-
day morning, July 30. Dr. Browne has
been here before and all rejoice in the
opportunity to hear him again.

Past Masters Confer

The Masonic Past Masters association
of Santa Clara County district exempli-
fied the third degree at Campbell Wed-
nesday evening in a most impressive
manner.

Following the work a delightful lunch
was served by the local lodge. Short
talks were given by a number of the
visitors.

breach.

Large Rubber Shipment

Twenty carloads of crude rubber, a
solid trainload, valued at a million dol-
lars, are on their way to New York from
San Francisco via the Southern Pacific's
Ogden Route. This shipment, which
came from Singapore, is the first con-
signement of rubber of such magnitude
to go overland from the Pacific Coast.
It was shipped here by the East Asiatic
Company on their steamer Bried.

The East Asiatic Company is a Dutch
concern with plantations and trading
posts in all parts of the world. Otto
Jeslop, who is its representative at San
Francisco, says his company is going to
operate monthly steamers directly from
Copenhagen thru the Panama Canal to
San Francisco and thence to Tokio and
Yokohama.
